Aqua Tracka Unit

Quick start: 3 steps

1 Switch it on

Plug in the power and press the rocker switch.
Water flows as normal. The lights show your limit.

2 Choose a limit

Press the button on the box (or A, B, C on the remote).
1 light = 25 L, 50 L or 100 L. No lights = free flow.

3 Use your water

When the limit is reached the valve pulses shut 4 times.
That is your warning. Then the count starts again from 0 L.

See it on your phone (optional)

1. Join Wi-Fi: VAT_Aqua_Tracka (no password)
2. Open: http://192.168.4.1 (stay connected if it says 'no internet')

Handy to know

- Reset the count: hold any remote button for 2 seconds.
- Blinking lights: limit reached. Slow blink: press button to reset.
- After a power cut your limit is remembered; the count restarts at 0 L.
